NOTE

This document should be viewed by running **man <(curl -s http://skiqqy.xyz/skiqqy.1)**

DESCRIPTION

I am currently studying Computer Science at Stellenbosch University, and am currently in my third year.

I have a massive love for Software Development (specifically lower level systems) and the GNU/Linux ecosystem. I am an advocate of the FOSS movement, and believe in it's ideals.

Primary skills include programming in C (language of choice), bash (scripting), python, java. I am proficient in backend web development (either in C, java or python) as well as working with databases.

WORK EXPERIENCE**At/for Stellenbosch University**

I have tutored and or "demi'd" multiple courses for SU, those including,

- First Year Mathematics
- Second Year Computer Science

SELECTED ARTIFACTS

These projects are hosted on a private repository, since many of these projects are re-used by SU, and hence must be hosted privately to prevent students from plagiarising.

If you are interested in viewing these, please send me an email, and I can provide you with a .tar of the project.

ALAN Compiler

ALAN is a pascal like language, and my second year Computer Science project was to write a compiler for the ALAN language, for more information feel free to read the spec. The compiler is written in C.

Othello Bot

This project was to create a bot to play the game Othello, the bot makes use of a negamax tree search with alpha beta pruning to find optimal moves. Written in C, using MPI API.

OnPoint

OnPoint is a food review website, that allows users to view reviews on certain websites, as well as create an account, and follow friends, and see their favorite restaurants.

OnPoint is written using a python backend (running on flask), neo4j DB, redis and Vue.js

Huffman Encoder

A compression tool using the Huffman algorithm, written in x86_64 assembly.

PRIVATE PROJECTS**cmesg**

A messaging application using a server written in C, and a client written in java, there are plans to extend cmesg to also support VoIP.

cmesg is hosted at <https://github.com/skiqqy/cmesg>

C45DiscordBot

A simple discord bot written in python, plans to extend it to play music, host files etc.

C45DiscordBot is hosted at <https://github.com/skiqqy/C45DiscordBot>

BUGS

Start too many side projects, instead of finishing them.

Endlessing ricing my desktop subtle plug -> <https://github.com/skiqqy/dwm>
